

Our client, a prominent conglomerate with over 25 years of experience in Sri Lanka, is renowned for its extensive and diverse portfolio across two strategic clusters. They are seeking an experienced, results-driven, and dynamic Civil Engineer to assume a leadership role in one of the well-established verticals within their Construction Chemical Cluster. This cluster focuses on a wide range of civil engineering projects involving the application of specialty construction chemicals.

DEPUTY GENERAL MANAGER – TECHNICAL & PROJECTS

The Construction Cluster, comprising several vertical companies, specialize in the manufacturing and application of specialty construction chemical solutions for building, road, and other structural construction projects.

The vacancy exists in the vertical focused on delivering new construction, maintenance, and repair projects, particularly in specialty construction chemical applications such as waterproofing, structural repair, retrofitting and more. This dynamic entity within the cluster excels in its field, demonstrating extensive technical expertise and prioritizing product and service quality, technology, and customer service. It continuously enhances its offerings through innovative products and modern technical solutions.

As the company enters its next strategic growth phase amid rapid expansion, the individual in this position will play a pivotal role. The candidate will be instrumental in achieving the vertical's strategic goals enabling successful completion of projects.

Core Responsibilities:

- Provide direction, motivation, supervision, and leadership to the technical team involved in fieldwork for civil engineering projects, including waterproofing, structural repair, and retrofitting. Inspire the team to deliver results that meet technical specifications, customer expectations, statutory requirements, and warranties and guarantees.
- Focus on leveraging the company's strong reputation and expertise to grow market share and increase project volume, thereby boosting sales across the company's scope of business in specialized construction chemical applications.
- Establish and maintain relationships with key stakeholders in the construction chemical industry, including architects, designers, contractors, consultants, sub-contractors, and related government agencies, to promote the company's products and services.

Requirements:

- Bachelor's Degree in Civil Engineering from a recognized university. An MBA or MSc is a definite plus.
- Minimum of 10 years of experience in the Civil Construction Industry, with at least 5 years in a senior managerial position focused on project management in specialized civil engineering functions which include Construction Chemical Applications.
- Strong understanding of Costing, Financial Management and Project Negotiations will be added advantage.
- Self-starter and dynamic leader of change, with charismatic leadership qualities, strong people skills, and the ability to communicate, engage, and align the team to achieve business results.
- Willingness to travel extensively within and outside the country to attend, canvass, and promote projects, meet clients, and supervise projects to ensure timely delivery and compliance with quality specifications.
- Strong attention to detail with excellent planning, organizing, and data analysis skills to ensure timely delivery.
- Team player with excellent interpersonal skills, a strong set of values, integrity, and leadership qualities.
- The individual will directly report to the Head of the Vertical and lead a technical team in projects.

Rewards:

- A highly competitive remuneration package that aligns with industry standards, complemented by opportunities for career advancement.
