Senior Engineer – Data Science

Job Profile

- Collaborate with cross-functional teams to identify business opportunities and develop data-driven solutions
- Use advanced analytical techniques to analyze large datasets, extract insights and provide actionable recommendations
- Work closely with cross-functional teams, including business analysts, engineers and product managers to understand business needs and translate them into data-driven solutions
- Design, develop and implement predictive and prescriptive models to address complex business challenges
- Evaluate model performance, conduct A/B testing and iterate on models to improve accuracy and effectiveness

Applicant's Profile

- Bachelor's Degree in Computer Science
- Minimum 06 years of experience as a Data Scientist, with a proven track record of delivering impactful solutions
- Experience with data visualization tools (e.g., Matplotlib, Seaborn, Tableau, Power BI)
- Proficiency in programming languages such as Python, R or Java
- Strong knowledge of data manipulation libraries (e.g., pandas, NumPy) and machine learning frameworks (e.g., scikit-learn, TensorFlow, PyTorch)
- Strong understanding of statistical concepts and techniques

Successful candidate will be provided with an attractive compensation package benchmarked with highest paid IT organizations in Sri Lanka along benefits.

Interested candidates are invited to apply for the position, all applications should be routed through our corporate website.
