

PEOPLE'S BANK

People's Bank, a premier bank in Sri Lanka with the largest customer base providing innovative financial solutions to its diversified clientele for over six decades and as a conducive environment for those who strive to achieve excellence and believe in professionalism, the bank is looking for talented & dynamic individuals to fill the following supportive position.

TECHNOLOGY RISK MANAGER

The Technology Risk Manager is responsible for identifying, assessing, managing, and mitigating technology-related risks within the organization. This role involves developing and implementing technology risk management strategies, policies, and procedures to protect the bank's information assets and ensure compliance with both internal and external regulations. The Technology Risk Manager will work closely with various departments, regulators, outsource service providers etc. to ensure that technology risks are effectively managed and that the bank is resilient against potential IT threats.

❖ DUTIES AND RESPONSIBILITIES

Planning & Reporting

- Develop, establish, and implement policies and frameworks for IT security and risk management.
- Monitor, analyze, and report the information related safety, and security measures of the bank.
- Prepare reports related to Technology risk to Board & Management committees required by DGM-Risk Management.

Leadership and Management

- Perform/monitor technology risk assessments, which comprise analyzing, identifying, describing, and quantifying technology risks that impact all business operations of the bank.
- Review technology risk-related disaster recovery procedures and prepare technology risk management plans to facilitate the bank's business continuity plan.
- Monitoring and analyzing technology risk-related security alerts.
- Implement and periodically review of the Risk and Control Self-Assessment (RCSA) process for information technology and information security related services, including third-party service providers.
- Conduct Risk and Control Self-Assessment (RCSA) process quarterly for information technology and information security related service.
- Establish/review/monitor key risk indicators related to Technology Risk Management.
- Design and establish a comprehensive technology Risk management process in line with CBSL direction no.16 of 2021 and its addendums.
- Ensure compliance with CBSL direction no.16 of 2021 and its addendums.
- Periodically check the achievement of action plans relevant to technology risk management.
- Assist senior management by aligning technology risk initiatives with business objectives.
- Assess and report reputational risks related incidents derived from technology risk and take/recommend mitigation actions to manage reputational/financial losses.

Market Scoping, Business Development & Brand Positioning

- Analyze technology risks at the time of introducing new technology driven products or services to the bank and report vulnerabilities and mitigating measures.
- Review key IT projects regarding their technology risks.

Relationship, Stakeholder and Key Account Management

- Maintenance of relationships with ISO Unit, IT Department, and Internal Audit Department.
- Develop and maintain good communication channels with other risk partners, such as Enterprise Risk Management, Operational Risk Management, etc.
- Create and maintain an external network with other senior IT risk managers and relevant risk forums.

Role-Specific Competencies

- Knowledge on Technology Risk Management, including cyber security.
- Technical knowledge on IT systems and digital products used by the bank.
- Communication skill including technology risk related presentations.
- Comply with regulatory qualifications decided by CBSL time to time
- Ability to increase awareness, provide education and training to employees inside the organization.
- Proper understanding of new technology developments and possible technology threats.
- Ability to analyze information security measurements of the bank and re-engineering.

❖ QUALIFICATIONS

Candidates should possess one of the following qualifications

- (ISC)2 Certified Information Systems Security Professional (CISSP)
- GIAC Information Security Professional (GISP)
- ISACA Certified Information Security Manager (CISM)
- ISACA Certified in Risk and Information Systems Control (CRISC)
- Master's degree in information security or Master's Degree in computer science/information technology specializing in Information Security awarded by a university or an institute recognized by the University Grants Commission of Sri Lanka.

METHOD OF SELECTION

Shortlisted applicants based on the stipulated qualifications will be called for an interview. The appointment will be made on contract basis and performance will be evaluated annually.

REMUNERATION

An attractive and negotiable remuneration package commensurate with qualifications and experience will be offered to the selected candidate.

APPLICATIONS
